## Window-Mounted Birdfeeder

December, 2008

For some, bird watching is a hobby. For others, it's a passion. The desire to be able to view birds at astonishingly close range is undeniable, and with our product, can be achieved within the comfort of your home. This is exactly what our window mounted birdfeeder offers!

Unlike other window mounted birdfeeders that normally have a one-way mirror, ours does not, allowing birds to be viewed in natural daylight and color. Our unique feeder is made from pure stamped copper, which ages naturally over time developing a rich patina. Alternatively, if you prefer, you can keep it bright by periodically polishing it with common copper cleaners.

Two suction cups and support brackets allow the birdfeeder to be easily mounted to the outside of a window. Each birdfeeder is 20" long by 1-3/4" wide and can also serve as a watering trough. Continuous 5/8" high side walls provide ample seed or water capacity.

Item #	Description
CP0702	Window-Mounted Copper Birdfeeder 20" long x 1-3/4" wide x 5/8" high
