

New Product Bulletin – Universal Retention System

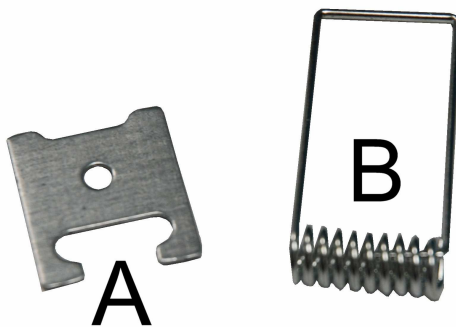

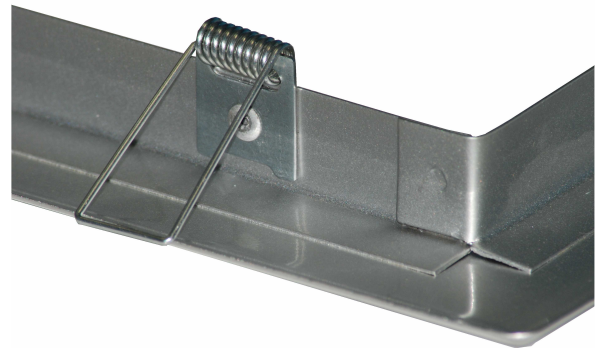

January, 2009

Mousetrap spring retention is a known concept, though it must invariably be integral to the trim. Not anymore!

Our new universal retention system can be added to almost any ceiling application.

With our new & simple Spring Retainer, our Mousetrap Springs can be added to almost any trim. Simply rivet the 3/4" wide x 7/8" tall Spring Retainer onto opposing side walls of most any trim, then snap on our mousetrap springs.

The upward force applied by the springs holds trims securely to the ceiling, yet allows removal with a downward pull.

	Item #	Description
A	0039	Spring Retainer
B	PP174	Mousetrap Spring
