

HOME LIGHTING & ACCESSORIES

EDITED FOR THE MANUFACTURERS OF
DECORATIVE LIGHTING AND ACCESSORIES

SUPPLY SECTION

New models of a butterfly bracket and mounting brackets in galvanized steel have been designed to facilitate installation of recessed lighting fixtures. The new butterfly bracket can be used in a variety of mounting techniques and is compatible with 1/2- to 3/4-inch bar hangers, C-channel (1/2- and 1 1/2-inch sizes), 1/2-inch EMT wiring, and furring strips.

The two new mounting bracket models are designed with either a straight end or a 90-degree bend, allowing the brackets to be used in either horizontal or vertical installations. Both brackets mate quickly with the butterfly bracket for faster vertical adjustments with no side play.
