HOME LIGHTING & ACCESSORIES

The linear clip (Model #0034) and plaster frame from Montreal-based **Tripair**[®] offer conveniences over traditional roto-clips. With $\frac{5}{8}$ -inch linear movement in $\frac{1}{8}$ -inch increments, this product accommodates a range of reflector sizes while providing variable pressures on the reflector to keep it from slipping out.

No installation tools, riveting, or fastening is necessary; the linear clip slides within guides in the plaster frame by simply hand-squeezing the tips together.

Since several reflector sizes can fit into the frame, suppliers do not have to inventory many dimensions.

The clips are fully retractable, enabling the plaster frame to serve as a template for cutting ceiling panels. Plaster frames may be ordered with either $6\frac{3}{4}$ or $7\frac{7}{8}$ -inch holes to accommodate reflector sizes from $5\frac{3}{8}$ to $6\frac{5}{8}$ inches and $6\frac{1}{2}$ to $7\frac{3}{4}$ inches, respectively.
