SPECIFIED LIGHTING DESIGN

The lighting resource for architects and designers

Light projection system

Downlight accessory features:

- Converts any small, recessed halogen light to a projection light
- Allows patterns to be projected onto floor, table, or wall (mirror adaptor included)
- Retaining springs clip onto a variety of recessed trims from 4- to 5 1/2-in. round and 4- to 4 1/2-in. square
- Diaphragm permits varying amounts of ambient room light
- Includes three pattern motifs: moon & stars, sun & palms, musical notes
- Thousands of detailed patterns are available, including custom
- Also includes three primary color filters, allowing six different colored light projections
- Light source can be any halogen bulb, but pattern appears best when using high-intensity sources such as 35- to 50-W MR16 or GU10 lamps.
