Xylophone Bar Kits

****New Music available online****

[Click Here](#)

May, 2009

In May 2007 we introduced our 8 full-note (single octave) Xylophone Bar Kit, CP0201; see www.triparinc.com/xylo. Due to popular demand, we are pleased to introduce two enhanced kits:

Making a xylophone from any of our three kits is one of the simplest woodworking projects, if you have the bars. Enter our xylophone bar kits, now available in three scale ranges, with each bar tuned to the required pitch, producing a pleasant musical scale.

CP0205 CP0203 CP0201

Whether you are a grandparent or parent making the xylophone for (or with) your youngster, or looking for a simple project to help initiate your aspiring percussionist to the loves of both music and woodworking, nothing could be more ideal.

CP0201

Each xylophone can be as simple as a plank of wood with the bars evenly spaced and supported with soft foam or felt. Taper the plank for a more purposeful look, or use slender bars of exotic wood for added pizzazz.

CP0203

To help amateur musicians, all bars now come stamped with the note; e.g. **C**, **C#**, etc.

The stamped bars are made from .075" thick x 1" wide steel, deburred for complete safety, and zinc plated to keep them looking shiny for years to come.

All bars are made in progressive dies for the most competitive pricing.

Each kit comes with complete, albeit simple instructions for making either of the xylophone styles shown.

CP0205

CP0201
8 Note Original Kit
(Single octave, all full notes)
